Mid- to high-end **print & cut** **eco-solvent inkjet printer**

CJV330-160

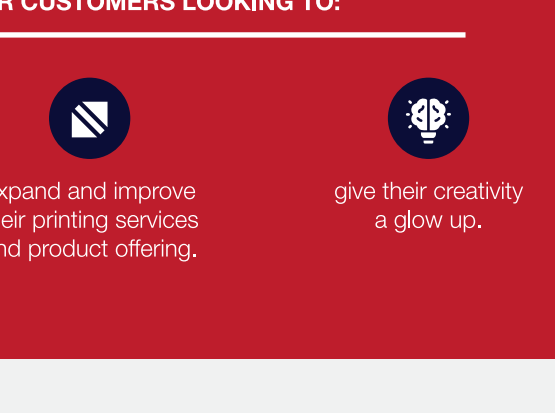

JV330-160

Mid- to high-end **eco-solvent inkjet printer**

FOR WHOM?

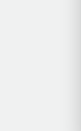

The CJV330-160 & JV330-160 are part of the new and improved 330 series. This series provides high-end & cost-effective printing solutions with new features and innovations for the sign graphics and textile markets (TS330-1600).

SUITABLE FOR CUSTOMERS LOOKING TO:

print much faster with stable and constant next-level image and colour quality.

expand and improve their printing services and product offering.

give their creativity a glow up.

WHY OUR CUSTOMERS LOVE THE 330-SERIES

NEXT-LEVEL IMAGE AND COLOUR QUALITY

A higher image sharpness.

More uniform density.

Reduced banding even at low pass printing.

HIGH QUALITY IS REALISED BY, AMONG OTHERS:

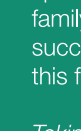

HIGH-PRECISION PRINT HEADS

2 print heads in staggered mode for high quality print.

MIMAKI CORE TECHNOLOGY

Mimaki Advanced Pass System (MAPS4), for reduced banding.

Waveform Control (WFC), for best possible image sharpness.

Variable Dots Technology (VDT), for smoother gradations.

Mimaki Fine Diffusion (MFD), for smoother colours.

Dot Adjustment System (DAS), for stable printing.

Mimaki Intelligent Heater (MIH), for consistent image quality.

"The Mimaki CJV330-160 is a low-cost printer which delivers high quality prints with minimal waste..... we can achieve CMYK colours exactly."

Tekin Ozalit, Tekin Gültekin, Founder (Advertising and printing services)

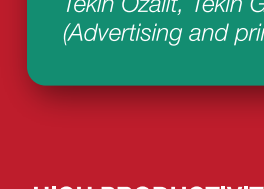

MIMAKI WEAVING DOT TECHNOLOGY (MWDT)

650% improvement in dot placement accuracy*

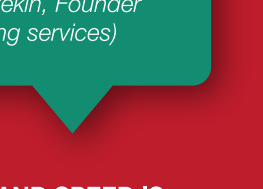

MWDT changes the order of ink droplet placement depending on the printing conditions - avoiding streaks or uneven printing due to print head or adjustment issues.

PRINTING SPEED | HIGH PRODUCTIVITY

CJV330-160

JV330-160

Max. Speed Banner: up to

100 sqm/h

PVC Production:

21 sqm/h

Speed gain up to

48%**

Increased nozzle row length for larger print passes and faster print speed.

"We're satisfied with the performance of the CJV330-160 in terms of print speed.... I congratulate the Mimaki family, because they have presented a successful machine to the market in this field."

Tekin Ozalit, Tekin Gültekin, Founder (Advertising and printing services)

HIGH PRODUCTIVITY AND SPEED IS REALISED BY, AMONG OTHERS:

Dual motor take-up system Intuitive roll-to-roll media handling with winding capacity up to 45kg.

Large ink supply system Supports SS21 & BS4 inks.

Up to 8C ink set including Orange and White.

2L and 500ml ink bag supply.

Uninterrupted Ink Supply System (UISS)***

"It's fast, flexible, and productive. The minute we installed it, we immediately saw improvements in terms of productivity and delivery/time to market."

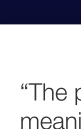

Eurotipo, Daniel Valente, Owner (a.o. signage, custom decor & large-format printing for supermarkets and retail)

IMPROVED STABILITY AND EASE OF OPERATION

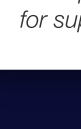

NEW AND IMPROVED FUNCTIONS LEAD TO BOTH INCREASED THROUGHPUT AND A REDUCTION IN OPERATOR ERRORS:

Media Changer Efficient change of media rolls | space saving system that can hold three rolls of media and allows fast media change by a single operator.

XY Slitter Inline sheet-fed cutting system that reduces post-processing.

Adjustable in-machine lighting For easier maintenance and checking of print process.

Cloth Wiper Fabric wiper for automatic cleaning function and reduced ink splattering during head cleaning.

Maintenance Area Easy access to cleaning area.

Remote Access The Mimaki Remote Access App allows the operator to multitask, dramatically increasing work efficiency.

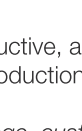

"The CJV330-160 has different features such as a media changer and advanced cutting system that make the operator's job easier."

Tekin Ozalit, Tekin Gültekin, Founder (Advertising and printing services)

"Mimaki printers meet our expectations for high productivity and stability, closely matching our policy of completing jobs quickly and in a short period of time."

Team Inc., Yusuke Inoue, President (a.o. vehicular, vending machine & temporary enclosure wrappings)

MIMAKI CORE TECHNOLOGY FOR CONTINUED PRODUCTIVITY

Nozzle Check Unit (NCU), to detect missing nozzles.

Nozzle Recovery System (NRS), to replace missing nozzles.

Automatic Cleaning Function, to keep the print head clean.

Mimaki Circulation Technology (MCT), preventing ink sedimentation.

"The printer is extremely efficient and productive, as well as easy to handle, meaning that we can reduce the overall production time."

Eurotipo, Daniel Valente, Owner (a.o. signage, custom decor & large-format printing for supermarkets and retail)

FOR SUPERIOR CUTTING (CJV330-160 ONLY)

"The machine provides a very efficient cutting service for our jobs requiring mass production."

ID Cut, to increase productivity.

Crop Mark Detection, for a high accurate cut.

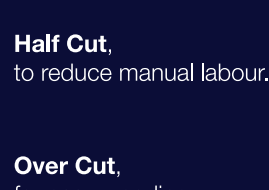

Half Cut, to reduce manual labour.

Over Cut, for easy weeding.

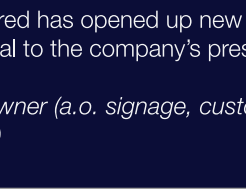

CJV330-160

CJV330-160

JV330-160

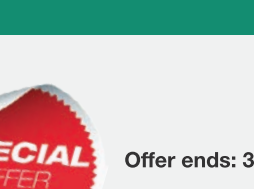

Create stickers & labels, vehicle graphics (or any other kind of wrapping), window decorations, banners & posters, heat transfer vinyl, backlit, wallpaper, floor stickers and more...

"The superior quality delivered has opened up new opportunities in different market niches, which is instrumental to the company's present and future growth."

Eurotipo, Daniel Valente, Owner (a.o. signage, custom decor & large-format printing for supermarkets and retail)

SUSTAINABILITY

CJV330-160

JV330-160

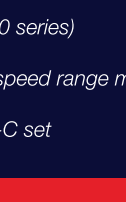

ENERGY & WASTE

Less material waste due to the Mimaki Ink Circulation System and ID Cut function.

INK

Mimaki's SS21 and BS4 inks are GREENGUARD GOLD certified.
